89 days left

Task 1

- Có khoảng 12 dạng
- Maps (thường có 2 maps còn nếu 1 thì tương đối khó và ít gặp)
- Process cũng dễ
- Describe how something works: khoai
- Odd question: khó
- Vd: so sánh sự phát triển con ngựa, phát triển của hòn đá

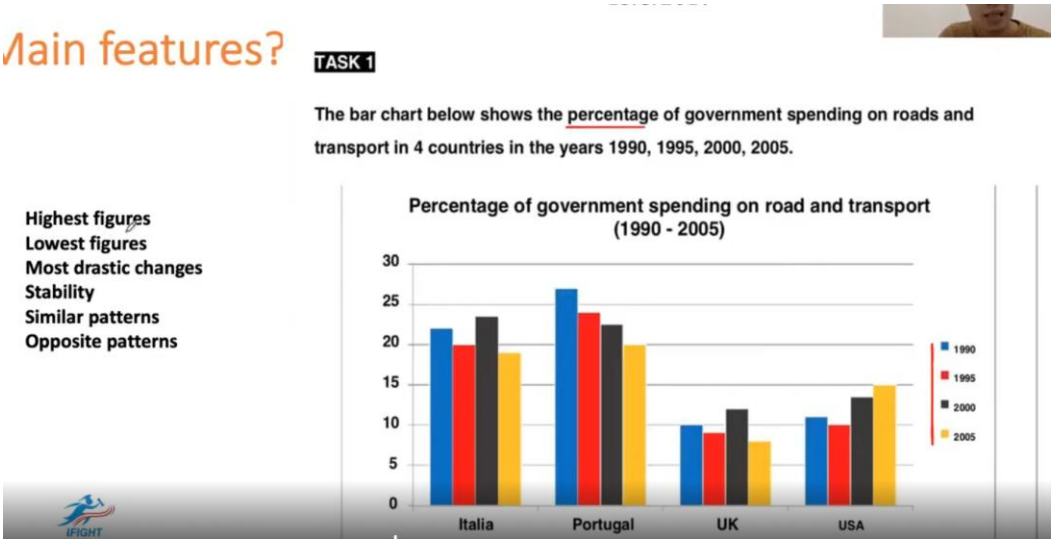

LESSON 2: CHANGE OVER TIME – TASK ACHIVEMENT.

- **Tiêu chí hoàn thành nhiệm vụ: tối thiểu 150 từ - 220 từ, chia thành 4 khổ: introduction, overview, body 1, body 2. Chỉ được summarize information: main features and make comparisons where relevant**

Main features:

- **Highest/ lowest figures**
- **Most drastic changes**
- **Stability**
- **Similar patterns**
- **Opposite patterns**

Bài tập theo đề:

Percentage -> đơn vị tương đối

Thời gian có thay đổi

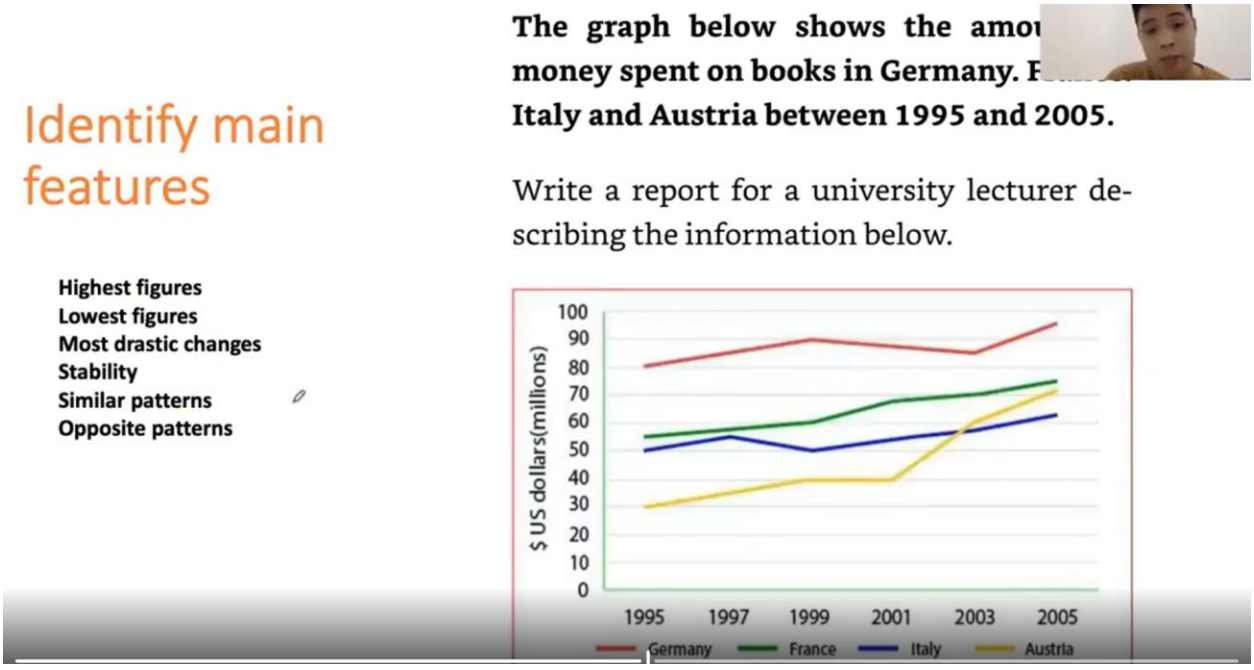

Highest: portugal

Lowest: UK

Similar: italia, UK (udud)

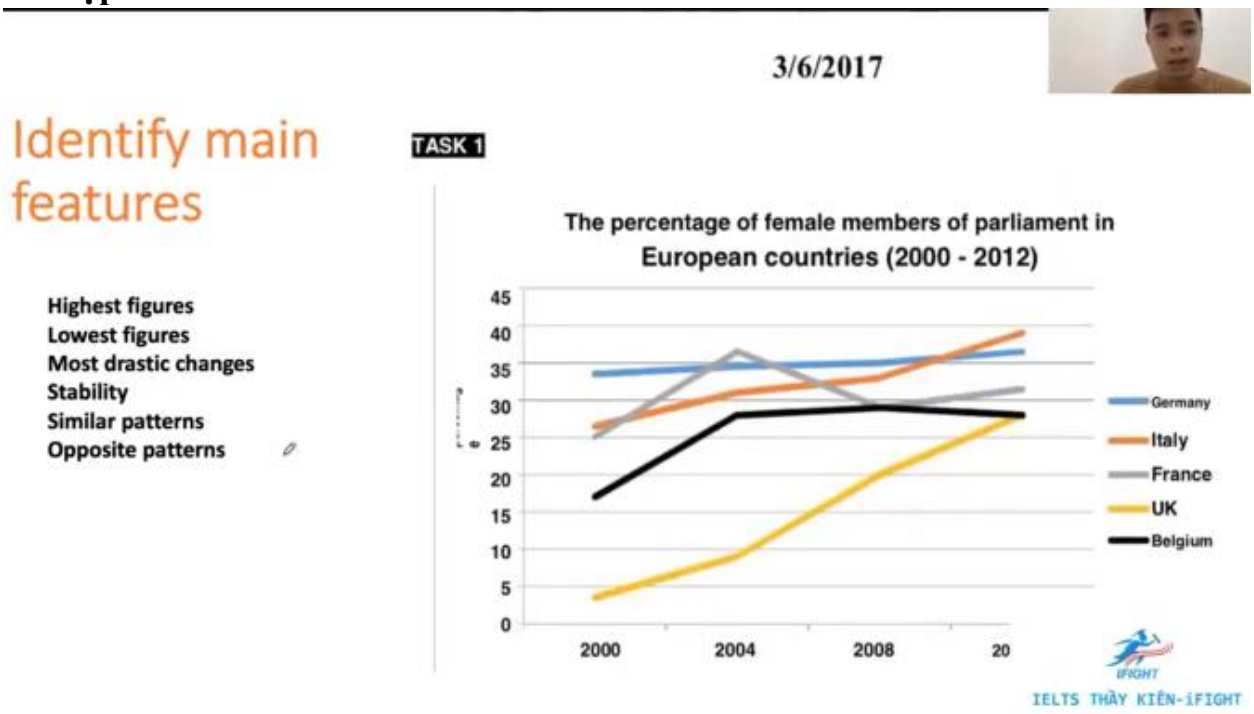

Opposite: portugal, usa

Bài tập 2:

- **Thay đổi theo thời gian**
- **Highest figures: đỏ**
- **lowest figures: vàng nhưng tới 2001**
- **Most drastic changes: vàng nhưng từ 2001 trở đi là tăng mạnh nhất**
- **Stability: đỏ từ 1995 – 2001, xanh blue 1995 - 9999**
- **Similar patterns: đỏ & xanh biển (tăng giảm tăng)**
- **Opposite patterns**

Bài tập 03:

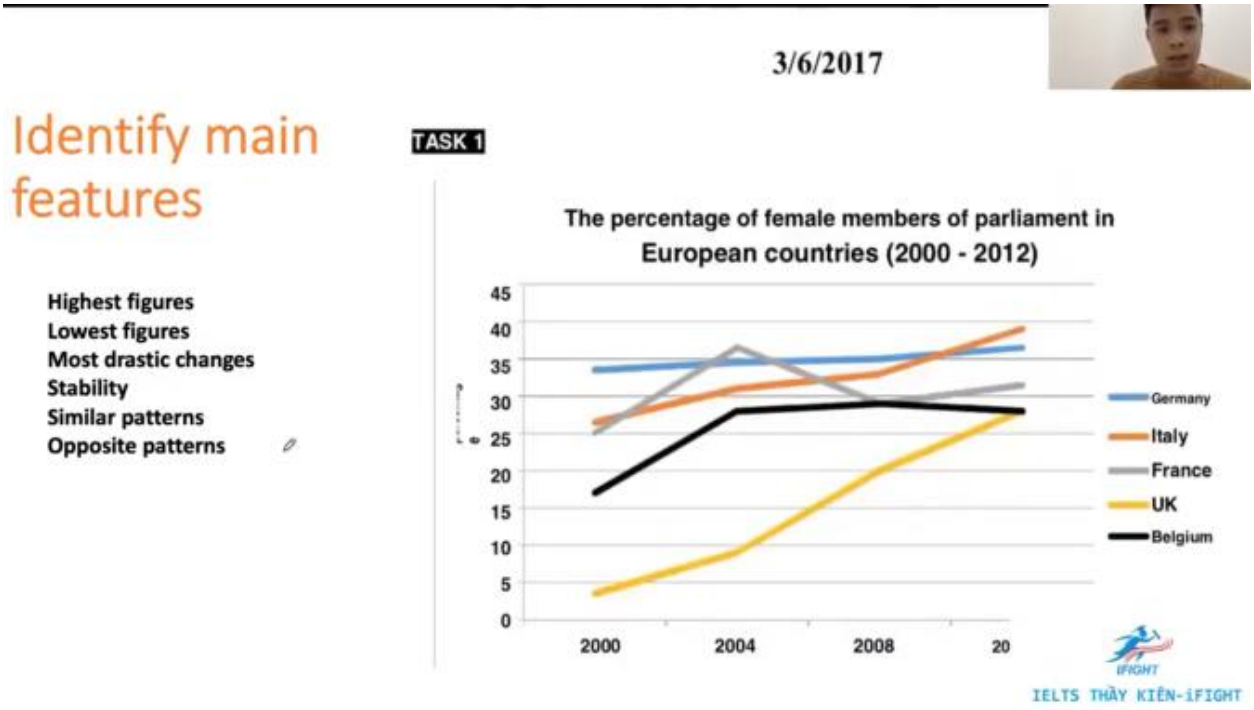

- **Thay đổi theo thời gian**
- **Highest figures: xám 2008, cam 2012**
- **lowest figures: vàng**
- **Most drastic changes: vàng**
- **Stability: xanh biển**
- **Similar patterns: xanh cam vàng**
- **Opposite patterns**

Cách viết Intro + Overview

- Intro thì chỉ cần paraphrase
- Line chart/ bar chart -> chart
- Shows -> illustrates (compares)

Overview (overall trends + differences)

Dành cho bài tập 3

Intro + overview

The line graph (chart) fllustrates (compares) the percentage of females elected in parliament in 5 European countries between 2000 and 2012. (paraphrase)

-> or The line graph illustrates how five European countries chose their members for parliament (nghị viên) between 2000 and 2012.

Overall, there was an increase in the proportion of female members in parliament in all 5 countries examined, with the most dramatic rise being seen in the figures for the UK. Despite that, the UK consistently had the lowest figures over the period.

(Overall trends + differences)

Nếu trend chung tất cả đều tăng và có một thăng tăng/giảm mạnh nhất có thể sử dụng cấu trúc with the most dramatic rise/ decline being seen in the figures for…

Despite that, the UK consistently had the lowest figures over the period.

-> mặc dù vậy thì UK luôn có số liệu nhỏ nhất

Bài tập 04:

Practice

ĐỀ THI IELTS 23-06-2018

Task 1: The table below shows daily oil production in 4 countries from 2000 to 2004.

(barrels per day)

	2000	2001	2002	2003	2004
Nigeria	205,000	210,000	190,000	210,000	213,000
Chad	0	0	0	8,000	50,000
Congo	275,000	234,000	222,000	215,000	203,000
Somalia	5,000	8,000	17,000	21,000	50,000

- **Thay đổi theo thời gian**
- **Xu huong chung: 3 tang, 1 giam**
- **Highest figures: congo luôn lớn nhất cho đến năm 2004, nigeria 2004 lớn nhất**
- **lowest figures: chad**
- **Most drastic changes:**
- **Stability: chad từ 2000 – 2002, nigeria 2001 – 2003**
- **Similar patterns: chad & somalia**
- **Opposite patterns: chad, somalia >< congo**

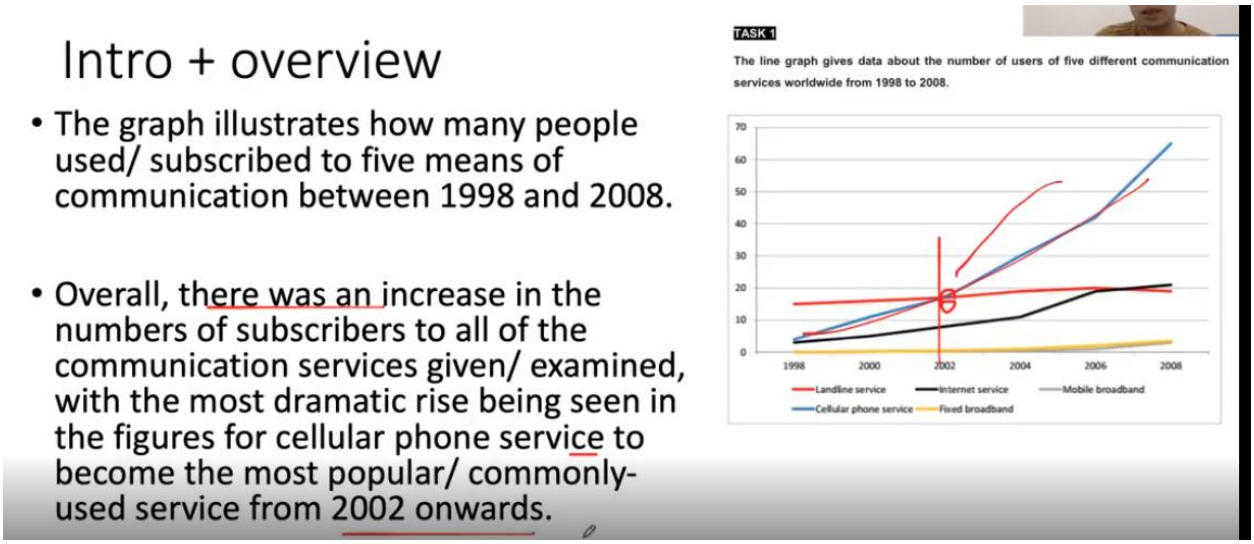

Overview:

Overall, there was an increase in the daily amount of oil produced in Nigeria, Chad and Somalia, **while** a gradual decline (in oil production/output) was seen in Congo. In addition, Congo generally produced the most oil among the 4 countries examined, but it was surpassed/ overtaken by Nigeria in the last year of the period.

-> Nếu có các trend khác nhau thì có thể dùng **while**

- was surpassed/ overtaken: bị vượt qua

Bài tập 05:

To become the most popular used service from 2002 onwards (onwards -> từ đó trở đi)

LESSSON 3: Grammar + coherence and cohesion – supper booster

-> Luyen tap overview

3.1. CHANGE OVER TIME

Bao gom 8 cau truc

(overview)

→ there was an increase/decrease in…, (with ..data.. witnessing the most dramatic rise -> thong tin **Most drastic changes**), while (if there another trend). In addition,… highest/ lowest figures… (thong tin so lieu cao nhat)

(câu mở đầu body 1) – thông dụng

** The number/ proportion of/ amount of… started at…, after which it experience a rise/ growth/ decline to…in… (in năm nào), before ending the period at… (nói 1 phát đến cuối luôn)

(câu mở đầu body 2)

** Data .... , with a subsequent increase/ decrease/ levelling off/fluctuation ... and a final ...

** The figure for ... (number/ proportion/ amount of ...) was at ... (or change .....), followed by an slow/ significant increase/ decrease to ...

(dùng trong trường hợp dữ liệu nhiều nên mình cần paraphrase khác đi)

- The figure for ... + V, and (but) + V
  -> the figures thay đổi như nào, and/but thay đổi như nào
- Similar/ opposite changes can be seen in the figure(s) for ... , which ...
  -> thay đổi giống/ ngược nhau… nếu như có nhiều số liệu giống khác nhau B,C thì "figures" có "s"
- The figure for ... saw similar/ opposite changes, V-ing
  -> giống/ khác nhau sau đó V-ing: tăng/ giảm
- The figure for ... + change, ending/ reaching ...
  -> tăng giảm vd: the figure for rises significantly, reaching at…

**: câu quan trọng

Ví dụ:

[01] The number/ proportion of/ amount of… started at…, after which it experience a rise/ growth/ decline to…in… (in năm nào), before ending the period at… (nói 1 phát đến cuối luôn)

Ex: the number of students studying abroad started 0.4 million, after which it experience it saw a dramtic rise to 1.4 million in 1985, before ending the period at 0.8.

Saw/ experienced/ witness

- Rise to: tăng đến
- Rise by: tăng được

[02] Data .... , with a subsequent increase/ decrease/ levelling off/fluctuation ... and a final ...

Ex: 0.4 million students studied abroad in 1970 in the US, with a subsequent considerable rise to 1.4 million and a final drop to 0.8.

[03] The figure for ... (number/ proportion/ amount of ...) was at ... (or change ...), followed by an slow/ significant increase/ decrease to ...

Ex: The number of students studying abroad in 1970 was 0.4 million, followed by a significant increase to reach a peak of 1.4 million in 1985, and a final drop to 0.8 15 years later.

-> The number of students studying abroad increased significantly from 0.4 million in 1970 **to reach a peak of 1.4 million in 1985**, followed by a final drop to 0.8 15 years later.

[04] The figure for ... + V, and (but) + V

Ex: . The number of students studying abroad increased (V) sharply from 0.4 at the beginning of the period to reach a peak of 1.4 in 1985, but later dropped (V) to 0.8 in the last year of the period examined.

[05] The number/ amount/ proportion .... + change, ending/ reaching ...

EX: The number of students studying abroad increased sharply, reaching a peak of 1.4 in 1985, but it later dropped to 0.8 in the last year of the period examined.

TÓM TẮT CÁCH SỬ DỤNG CHO CÁC CẤU TRÚC:

1. Phù hợp với hai nhịp chuyển động chính

[01] The number/ proportion of/ amount of… started at…, after which it experienced a rise/ growth/ decline to… in…, before ending the period at…

- **Ngữ cảnh sử dụng:** Dùng để **tóm tắt toàn bộ xu hướng của 1 đường/hạng mục từ đầu đến cuối giai đoạn** chỉ trong 1 câu duy nhất.
- **Đặc điểm xu hướng:** Phù hợp nhất cho dữ liệu có **2 nhịp chuyển động chính** (ví dụ: Tăng/giảm ở giữa giai đoạn → Giảm/tăng về mốc cuối).

2. Chuỗi xu hướng liên tiếp diễn ra sau mốc ban đầu

[02] Data... , with a subsequent increase/ decrease/ levelling off/ fluctuation... and a final...

- **Ngữ cảnh sử dụng:** Dùng để **nêu mốc bắt đầu, biến động tiếp theo và điểm kết thúc** bằng cách sử dụng cụm danh từ (sau *with*).
- **Đặc điểm xu hướng:** Dùng khi muốn **biến đổi cấu trúc câu** (tránh lặp động từ), mô tả chuỗi xu hướng liên tiếp diễn ra sau mốc ban đầu (tăng/giảm/đi ngang/dao động → mốc cuối).

3. Mô tả một đợt tăng/giảm mạnh trước, tạo thành đỉnh/đáy, rồi mới chuyển sang xu hướng tiếp theo cho đến cuối kỳ.

[03] The figure for... was at..., followed by a slow/ significant increase/ decrease to...

- **Ngữ cảnh sử dụng:** Dùng để **miêu tả xu hướng có điểm nhấn đặc biệt** (như đạt đỉnh *reach a peak of* hoặc chạm đáy *hit a low of*).
- **Đặc điểm xu hướng:** Rất thích hợp khi muốn mô tả một **đợt tăng/giảm mạnh trước, tạo thành đỉnh/đáy**, rồi mới chuyển sang xu hướng tiếp theo cho đến cuối kỳ.

4. hai xu hướng trái ngược hoặc nối tiếp nhau - độ tương phản rõ rệt

[04] The figure for... + V1, and/but + V2

- **Ngữ cảnh sử dụng:** Dùng để **ghép 2 xu hướng trái ngược hoặc nối tiếp nhau** thành một câu ghép trực tiếp bằng liên từ (*and* / *but*).

- **Đặc điểm xu hướng:** Rất hợp khi xu hướng có **độ tương phản rõ rệt** (ví dụ: giai đoạn đầu tăng rất mạnh *but* giai đoạn sau lại quay đầu giảm).

5. Nhấn mạnh mốc đạt đỉnh (reaching a peak of...) hoặc mốc kết thúc (ending at...) ngay sau một đợt biến động mạnh.

[05] The number/ amount/ proportion... + change, ending/ reaching...

- **Ngữ cảnh sử dụng:** Dùng cấu trúc **rút gọn mệnh đề (V-ing)** để nhấn mạnh **kết quả hoặc cột mốc trung gian/cuối cùng** mà dữ liệu đạt được.
- **Đặc điểm xu hướng:** Thích hợp khi muốn nhấn mạnh mốc đạt đỉnh (*reaching a peak of...*) hoặc mốc kết thúc (*ending at...*) ngay sau một đợt biến động mạnh.

LESSON 4: VOCAUBLARY

Important words (dùng từ đơn giản và thêm trạng từ là đủ - be boring: acdemic)

- Increase/ grow/ rise
- Decrease/ deline/ drop
- Flutuation/ flutuate in the range from..to…/ hover around… (trong khoảng)
- Significant/ considerable / dramatic/ sharp (ly)
- Slight/ slow/ gradual (steady)/ marginal (ly)/ moderately
- Reach a peak of… = peak at = reach/ hit a high of
- Reach a low of .. = hig a trough of
- Remain unchanged/ stable = level off (a levelling off)

Paraphrasing

- danh từ đếm được (how many -> intro)

- **the number of As/ A numbers/ how many S+V/ the figure/ data ... / synonym/ that-who**

synonym: diễn giải định nghĩa ra

intro sẽ dùng: how many và không dùng lại

The number of tourists = tourist numbers = the number of travelers = the number of people traveling to ... / how many people traveled to... / tourist numbers/

500 people traveled to Vietnam.

- danh từ không đếm được (how much -> intro)

the amount of/ how much S+V/ the figure/ data ....synonym

- The amount of money spent on books in Vietnam in 1999 was 1 million dollars.
- The chart illustrates how much people in five countries spent on books from 1999 to 2019
- = 1 million dollars was spent on books by Vietnamese people in 1999
- = 1 million dollars was expended on books by people in Vietnam in 1999

- phần trăm

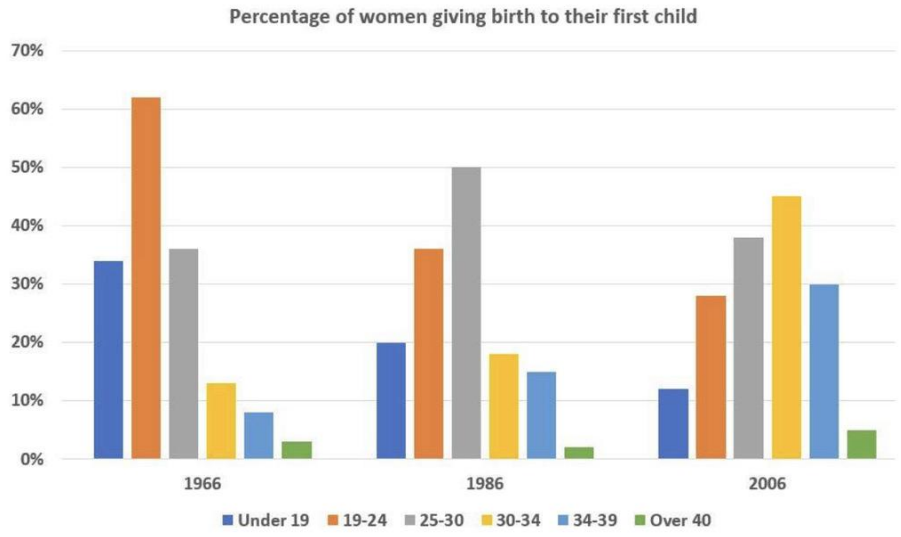

Percentage = proportion =share/ how or how many - how much/ data ... / the figure/ synonym

- The proportion of female members in parliament
- = The percentage of members who are female in parliament
- = the share of parliamentary members who are women
- = The percentage of women holding a position in parliament
- The chart illustrates how many women were elected to work in parliament in five countries from 2000 to 2015.

BÀI TẬP TỰ LÀM SAU KHI LÀM LESSON 3, LESSON 4

Bài 1: The chart below gives information about the age of women in Australia when they gave birth to their first child in 1966, 1986 and 2006.

- **Task 1:** Bar Chart

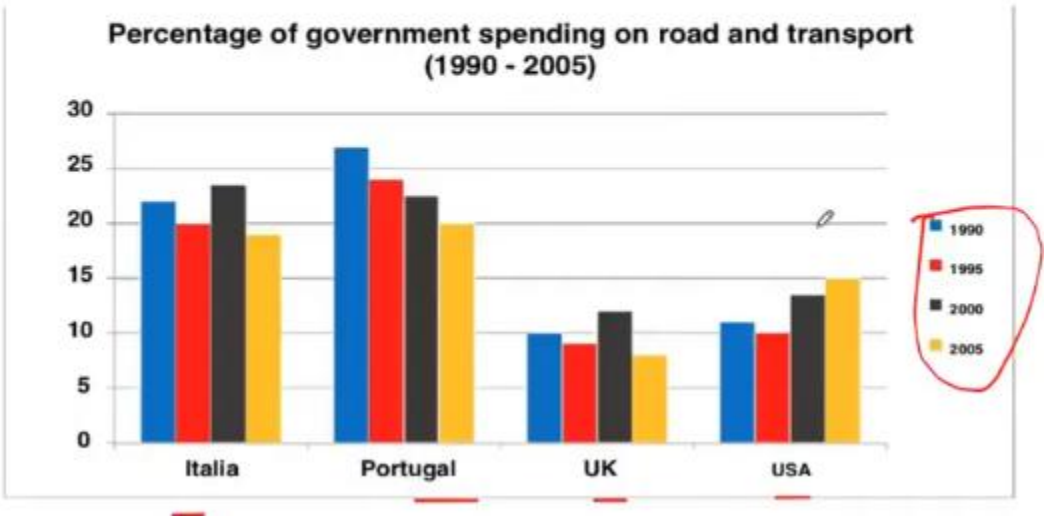

Lesson 1: type 1 – 4 categories

Example 1:

TASK 1

The bar chart below shows the percentage of government spending on roads and transport in 4 countries in the years 1990, 1995, 2000, 2005.

Intro:

- The chart illustrates how much governments in four countries invested in roads and transport between 1990 and 2005.

(N không đếm được + dùng tiền -> how much)

- The chart illustrates how governments in four countries invested in the transport infrastructure between 1990 and 2005.

(How cách nó dùng tiền)

- The chart illustrates the percentage of government expenditure on roads and transport in four countries between 1990 and 2005.

(không khuyến khích) -> nên sử dụng how much/ how many/ how

Overview:

Overall, there was a decline in the proportion of government spending on roads and transport in Italy, Portugal and the UK, while (;meanwhile,) a rise was seen

in the USA. In addition, Portugal generally had the highest figures throughout the period.

- **Nếu muốn dùng meanwhile thì dùng ;**
- **Nếu '2000' luôn to nhất thì dùng: consistently , còn trong bài nó không to nhất tại Portugal nó không to nhất nên nó dùng: generally**

Body 1:

The share = the percenatge

Conversely: ngược lại = by contrast

The share of the government's budget spent on roads and transport in Portugal started at about 27%, after which it saw a progressive decrease to exactly 20% in 2005. Conversely, the figure for the USA rose from just over 10% in 1990 to 15% in 2005, despite a small fall in the first 5 years.

Dóng, khoảng: About = Approximately = around = roughly

Cao hơn một chút: Just over = north of = upward of

Thấp hơn một chút: Just under = shy of = downward of

Chính xác: Exactly = precisely

Body 2:

Fluctuation thì nên miêu tả trước khi kết thúc để miêu tả rõ:

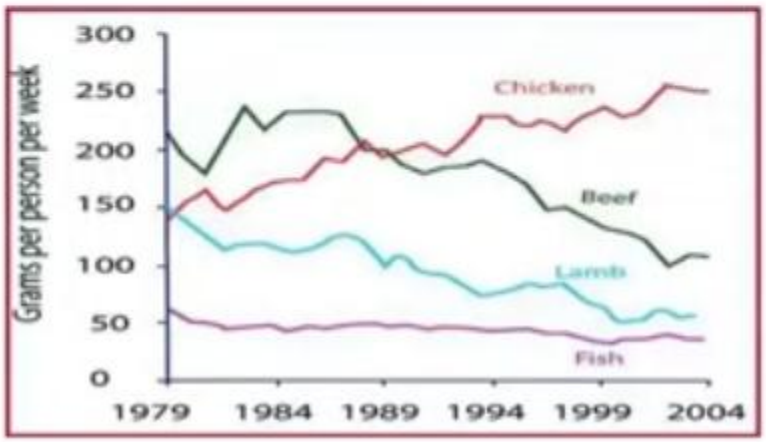

Approximately 22% of the Italian national budget was spent on/ went into the transport infrastructure, with subsequent fluctuations and a final decline from 24% in 2000 to about 19% in 2005. Similarly, the figure for the UK fluctuated in the range from 9% to 13% from 1990 to 2000, before ending the period at around 7%. *(followed by a declining…to bao nhiêu)*

Example 2:

- **Năm thời gian thay đổi**
- **1 tăng, 3 giảm**
- **Đơn vị: consumption -> không đếm được -> dùng how much**

The graph below shows the co... of fish and some different kin... in a European country between 1979 and 2004.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Intro + overview:

The line graph illustrates how much fish and some other kinds of meat were consumed/ used/ eaten per person in a country in Europe from 1979 to 2004.

Overall, there was a decline in the amount of beef, lamb, and fish eaten, while the figure for chicken increased to surpass that of beef, making (chicken was increasingly used and became the most ...) it the most consumed type of meat from **1989 onwards**. (đoạn giao nhau giữa chicken và beef -> chicken tăng lên cao nhất)

Body 1:

The amount of beef eaten per person in the country examined started at about 220 grams, after which it saw fluctuations until 1989, before decreasing to end the period at around 100 grams. Conversely, the figure for

chicken rose from just under 150 grams per person (GPP) to north of 200 gpp in 1989 and kept rising to reach 250 gpp in the final year.

Body 2:

150 grams of lamb was used by an average person in the country mentioned in 1979, with a decline to approximately 75 gpp in 2004. Meanwhile/ in the meantime (trend không hoàn toàn giống nhau), the figure for fish decreased slightly from around 60 gpp to just under 50 gpp after a few years and maintained at this level towards the end of the period.

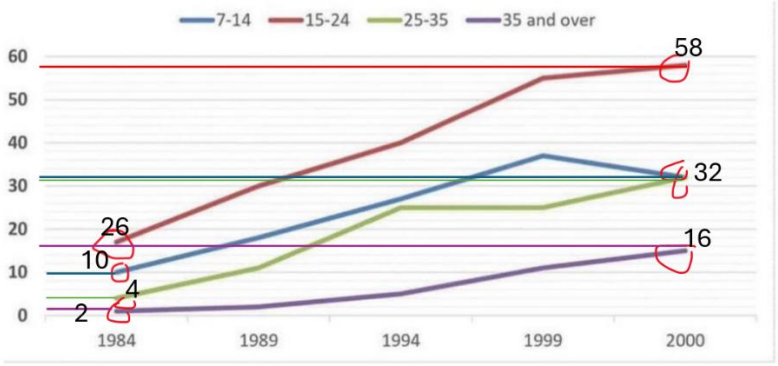

Step by step cho ít số liệu (4 categories):

- how much/ how many/ how cho intro
- there was nếu có trend khác cho while, xong nói về to bé cho overview
- paraphrase cho S của body 1 rồi dùng started at, after which sau đó dùng the figure for cho thằng giống/ ngược nó
- đảo số liệu lên đầu để paraphrase rồi dùng with rồi dùng meanwhile/ in the meantime nếu nó giống (similarly)/ ngược trend (conversly) sau đó dùng the figure cho body 2

Bài luyện tập

Bai 1:

- **Task 1:** The graph below shows the percentage of people in the different age group who went to the cinema once a month in Great Britain. Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Thay đổi theo thời gian
Xu huong chung: tat ca deu tang
Highest figures: 15 -24 (red)
lowest figures: 35 and over
Most drastic changes: red
Stability: purble (1984-1989), green (1994 – 1999)
Similar patterns:
Opposite patterns: xanh & do

Intro:

The line chart illustrates the percentage of how much people in the different age groups went to the cinema once a month in Great Britain from 1984 to 2000.

Overview:

There was an increase in the proportion of people **who went** to the cinema in **all** age groups. In addition, **the 15–24 age group** consistently had the highest figures, while **the group aged 35 and over recorded** the lowest figures throughout the period.

Body 1:

The share of the youngest age group increased sharply from **10%** at the beginning of the period to reach a peak of **around 37%** in 1999, **before dropping** to **32%** in the last year of the period examined. **In the meantime**, the figure for **people aged 15–24** went up significantly from **around 26% in 1984** to **55% in 1999**, **and reached** the highest point at **nearly 58% in 2000**.

Body 2:

Approximately 4% of people aged 25–35 went to the cinema in 1984. This figure experienced a considerable rise to just over 25% in 1994, remained unchanged at this level until 1999, before a final increase to 32% in 2000. Meanwhile, the figure

for those aged 35 and over started at the lowest point of around 4% in 1984, increased slightly from 1984 to 1994, and continued to rise steadily to reach around 15% in 2000.

Cau truc su dung – bai 1

TASK 1

Draft: Trend chung luôn tăng, vàng tăng mạnh nhất nhưng cũng nhỏ nhất

Intro + overview:

The line graph illustrates the percentage of females elected in parliament in 5 European countries between 2000 and 2012.

Overall, there was an increase in the proportion of female members in parliament in all 5 countries examined, with the UK witnessing the most dramatic rise. Despite this, it consistently had the lowest figures throughout the period.

Cấu trúc để nói về luôn thấp trong period: Despite this, it consistently had the lowest figures throughout the period.

Body 1 + Body 2:

The percentage of positions in parliament held by women in Germany was about / start at 34%, after which it saw a gradual rise to 36% in 2012. Similar changes, **but to greater extents**, were seen in the figures for Italy and the UK, which grew from 26% to almost 40% and from 4% to around 27% respectively.

- **Extents: mức độ**

  Nếu mức độ lớn thì là: the greater extents, ngược lại: lesser extent (dùng 's' cho extents và figures vì nhiều nước còn nếu một nước sẽ là 'to a greater extent'

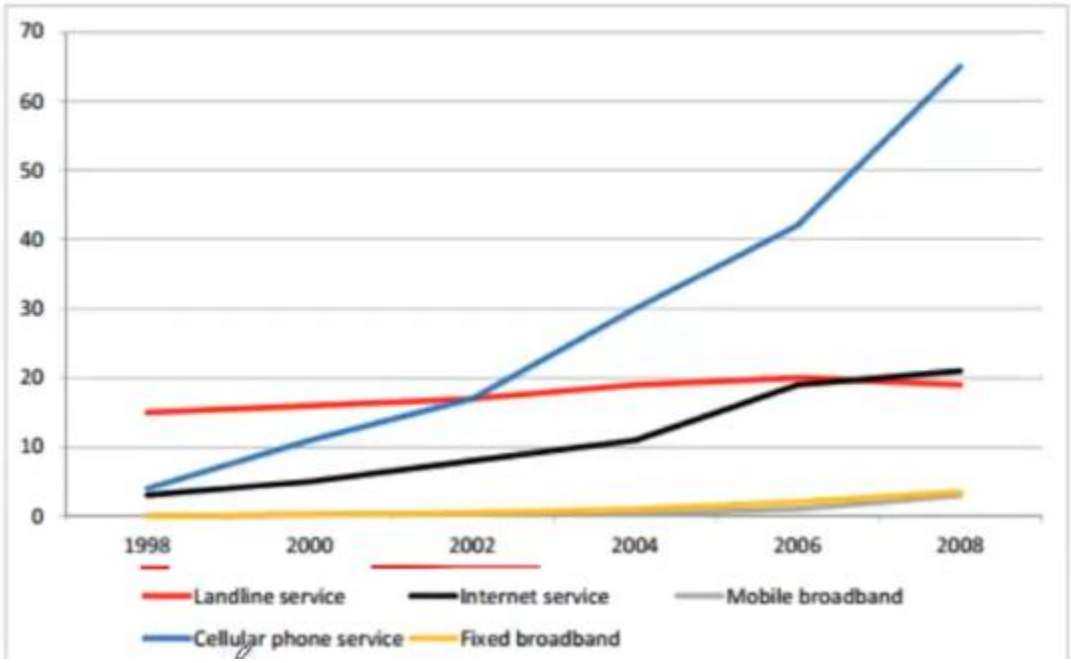

- Respectively: theo thứ tự tương tự

25% of members in France's parliament were women, with a subsequent jump to reach a peak at around 37% by 2004 and a final increase from 30% 2008 to 32% in 2012. Meanwhile, the figure for Belgium increased from 17% in 2000 to 28% in 2004 and **levelled off** towards the end of the period.

Example:

TASK 1

The line graph gives data about the number of users of five different communication services worldwide from 1998 to 2008.

Draft: trend chung là tăng, xanh tăng mạnh nhất và từ 2002 trở đi là lớn nhất

Intro + Overview:

The chart illustrates **how many** people used five different means of communication worldwide between 1998 and 2008.

Overall, there was an increase in the number of users of all five communication services, with cellular phone service enjoying the most considerable growth to become by far the most used/popular from 2002 onwards.

- Cấu trúc cho tăng mạnh sau đó luôn lớn nhất từ năm nào đó: with cellular phone service enjoying the most considerable growth to become by far the popular from 2002 onwards.

Body 1:

The number of subscribers to landline service started at 15 million**, after which** it experienced a gradual rise to 20 million in 2006, before ending the period at about 19 million. **Similarly**, not until the year 2002 did people start using fixed broadband and mobile broadband, and the figures for these two services increased slightly to 4 million.

- similarly: tương tự chứ ko phải hoàn toàn giống

Body 2:

5 million people subscribed to cellular phone service in 1998, **with** a gradual growth to roughly 18 million 4 years later, and a final substantial growth to just over 65 million at the end of the period. **Similar changes, but to a lesser extent, can be seen in the figures for internet service, which** increased from just under 5 million in 1998 to exactly 20 million in 2006, followed by a final levelling off towards the end of the period.

- substantial: tăng rất mạnh = significant = sharp

- cấu trúc 2 trend giống nhau nhưng một cái tăng mạnh hơn cái còn lại -> xong rồi miêu tả đến ending period: Similar changes, but to a lesser extent, can be seen in the figures for internet service, which increased from just under 5 million in 1998 to exactly 20 million in 2006, followed by a final levelling off towards the end of the period.

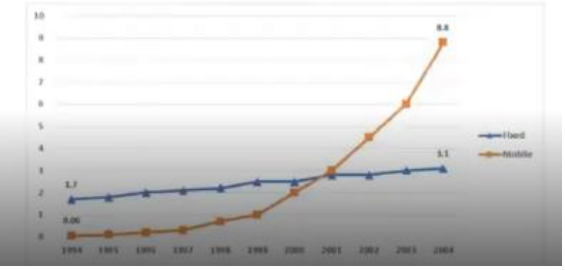

Paraphrase;

User = subscribers

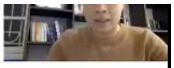

LESSON 3: <4 CATEGORIES

1. Dạng bài :

2. Cách làm

Thường là chia theo thời gian (chia đôi)

3. Sample 1:

Sample 1

- **Task 1:** The table below shows the numb made in three countries in 2003, 2006 and 2009. Summarize the information by selecting and reporting the main features and make comparisons where relevant.

The number of cars made in three countries in 2003, 2006 and 2009

	2003	2006	2009
Argentina	235,088	352,759	466,089
Australia	452,163	341,268	245,624
Thailand	735,852	1,162,356	999,963

IELTS THẦY KIÊN-iFIGHT

Intro:

The table illustrates how'many cars were produced in Argentina, Australia and Thailand between 2003 and 2009.

Overview:

Overall, there was an increase in the number of cars manufactured in Argentina and Thailand, while a constant decline was seen in Australia' car production. It is also clear that Thailand consistently had by far the highest figures throughout the period, even though a considerable decline was seen in the latter half of the period.

- Constant decline: giảm đều

- in the latter half of the period.

Body1:

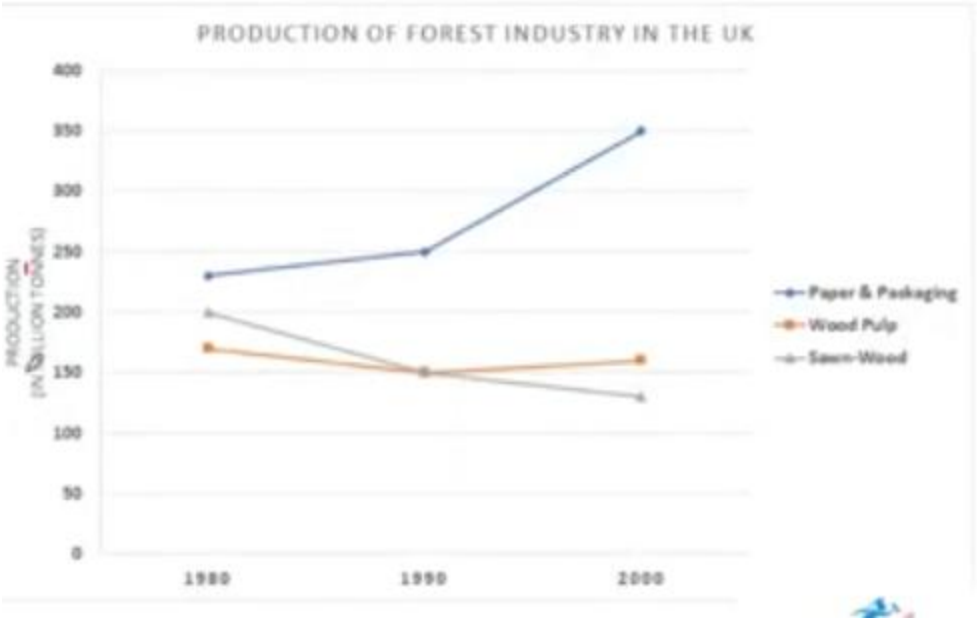

The number of automobiles manufactured in Thailand started at 735,852 units, after which it saw a dramatic rise to 1,162,356 in 2006. A similar change was seen in the figure for Argentina, which increased from 235, 088 to 352, 759 in the first 3 years. By contrast, 452, 136 cars were made in Australia in 2003, with a subsequent significant decline to 341, 268 units in 2006

Body 2:

From 2006 to 2009, the number of cars produced in Argentina continued to increase, reaching 466, 085 units. Conversely, the figures for Thailand and Australia dropped to 999,963 and 245, 624 units. (171 words)

4. Sample 2

- **Task 1:** The line graph below shows t
of paper, wood pulp and sawn-wood
1980 to 2000. Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Intro:

The chart illustrates how much paper, wood pulp and sawn- wood were produced in the UK between 1980 and 2000.

Overview:

Overall, there was a dramatic increase in paper and packaging production in the UK, especially in the latter half of the period, while the opposite trend can be seen in the figures for sawn wood and those for wood pulp fluctuated slightly. It is also clear that the amount of paper and packaging material produced in UK had by far the highest figures throughout the years.

Body 1:

The amount of paper and packaging produced in the UK started at about 240 million tons, after which it saw a slight increase to 250 million tons ten years later. Opposite changes can be seen in the figures for wood pulp and Sawn-wood, which

decreased from 200 and 165 million tons to exactly 150 million tons in the first 10 years.

Body 2:

From 1990 to 2000, the amount of paper and packaging produced rose significantly, reaching 350 million tons. The figure for wood pulp saw similar changes, but to a much lesser extent, growing to roughly 160 million tons. Conversely, the production of sawn-wood kept decreasing to approximately 125 million tons. (195 words)

Lesson 5: 2 years

1. Dạng bài:

The two pie charts below s
shopping sales for retail se
in 2005 and 2010.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

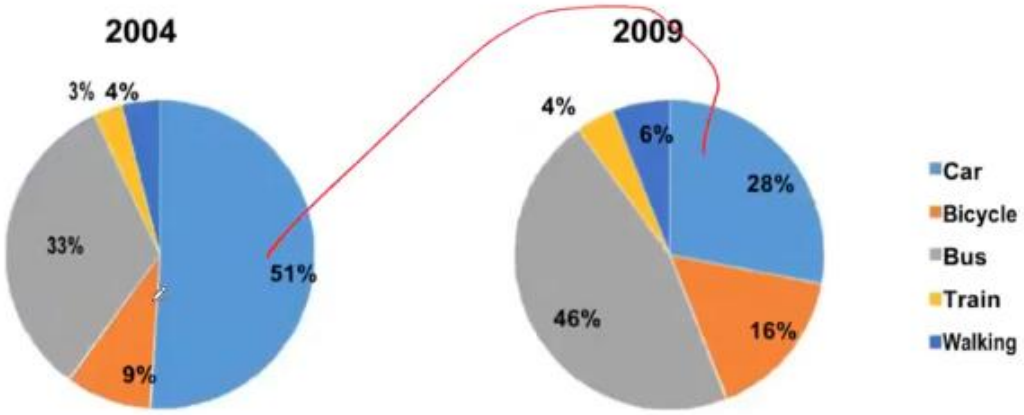

Nó ko chia yheo thời gian mà chia theo ngang (categories)

TASK 1

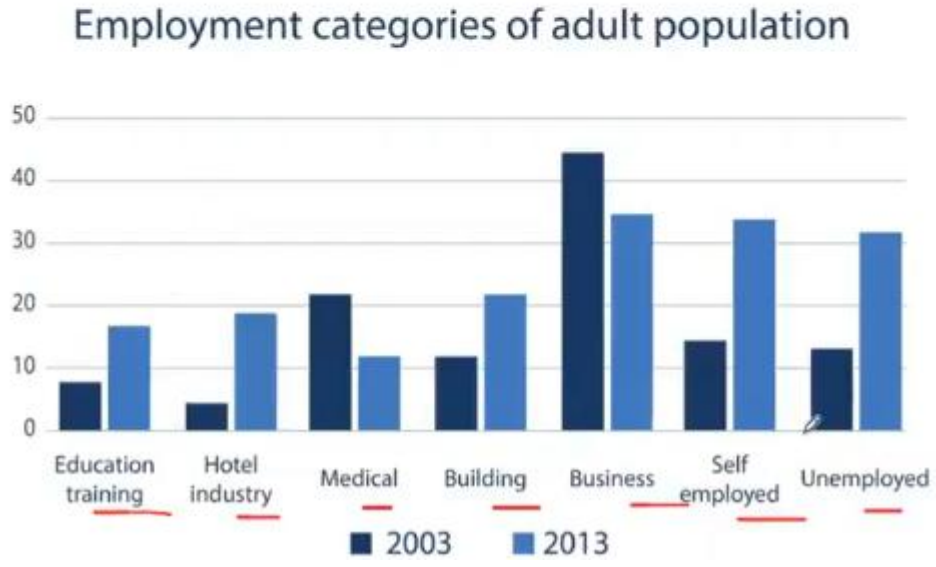

The charts show the main methods of transport of people travelling to one university in 2004 and 2009.

Summarise the information be selecting and reporting the main features, and make comparisons where relevant.

Task 1: The graph gives inform about employment categories of a country in 2003 and 2013

7 số liệu, 2 năm – nhóm theo tăng giảm

Khổ: lớn theo khổ

Khổ còn lại là nhỏ hơn:

2. Sample 1

Draft:

2005	2010	Muc do
Excellent (lowest)	Excellent	Tang (5% -> 28%)
Good	Good (highest)	Tang (14% ->39%)
Satisfactory (highest)	Satisfactory	Giam (45% -> 17%)
Very poor	Very poor (lowest)	Giam 15% -> 4%
Poor	Poor	Giam 21% -> 12%

Intro + overview:

The pie charts illustrate visitors' responses to a survey about customer service at the Parkway Hotel in 2005 and in 2010.

Overall, there was a significant decline in the proportion of hotel guests rating customer service as satisfactory, poor or very poor, while an opposite trend can be seen in the figure for those describing the hotel's service as good or excellent. In addition, the majority of customers gave a 'satisfactory' response in 2005, but in 2010, the majority felt that the hotel's service was good.

Body 1:

The percentage of hotel's visitors rating its customer service as excellent started at 5%, after which it saw a significant rise to 28% in 2010. Furthermore, only 14% of guests described customer service in the hotel as good in 2005, with a subsequent three-fold increase to 39% five years later. As a result, the figure for people giving a satisfactory' response declined significantly from 45% to 17% over the period.

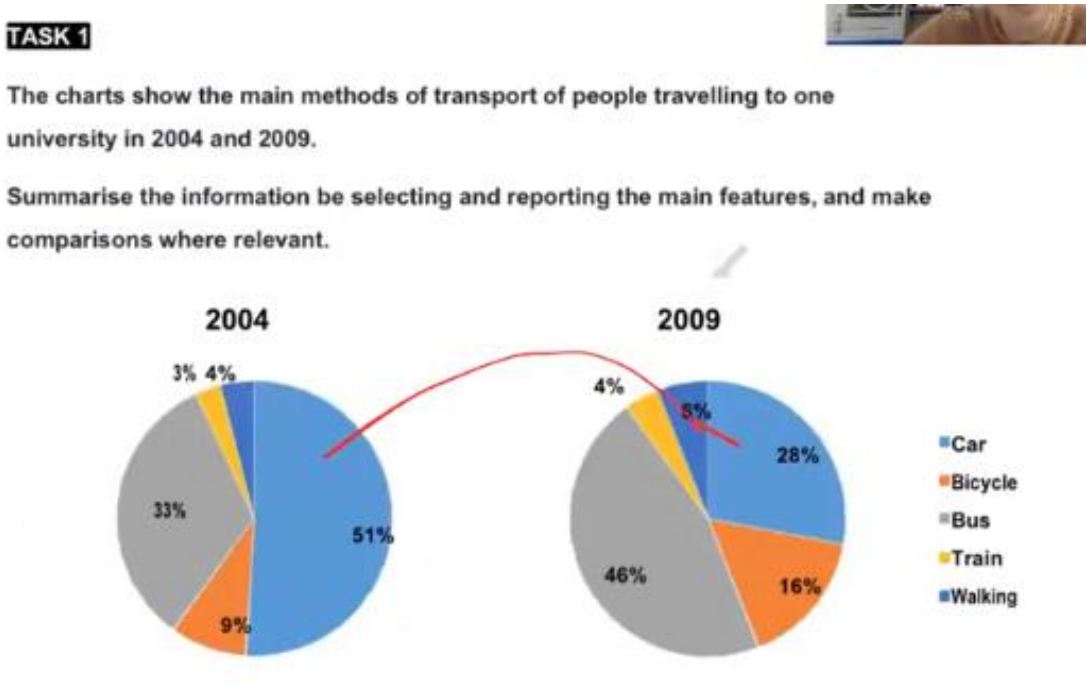

- hotel's visitors = hotel's guests

- three-fold: gap 3 lan

Body 2:

The proportion of guests who considered the hotel's customer service to be poor almost halved, ending at 12%. A similar change can be seen in the figure for people who thought customer service to be very poor, which dropped from 15% to only 4% over the 5- year period.

3. Sample 2

Intro + overview:

The pie charts illustrate how students in a university traveled to school in 2004 and 2009.

Overall, there was a significant decline in the proportion of people traveling to the examined university by car, while an increase was seen in the figures the other means of transport. In addition, the majority of students chose to commute to their university by car in 2004, and by bus in 2009; by contrast, the figures for people opting to take a train or walk to school were negligible in both years.

- negligible: không đáng kể

Body 1:

The percentage of people driving to university started at 51% in 2004, after which it experienced a considerable fall to 28% in 2009. The reverse trend can be seen in the figure for those going to this university by bus, which rose from 33% in 2004 to 46% in 2009.

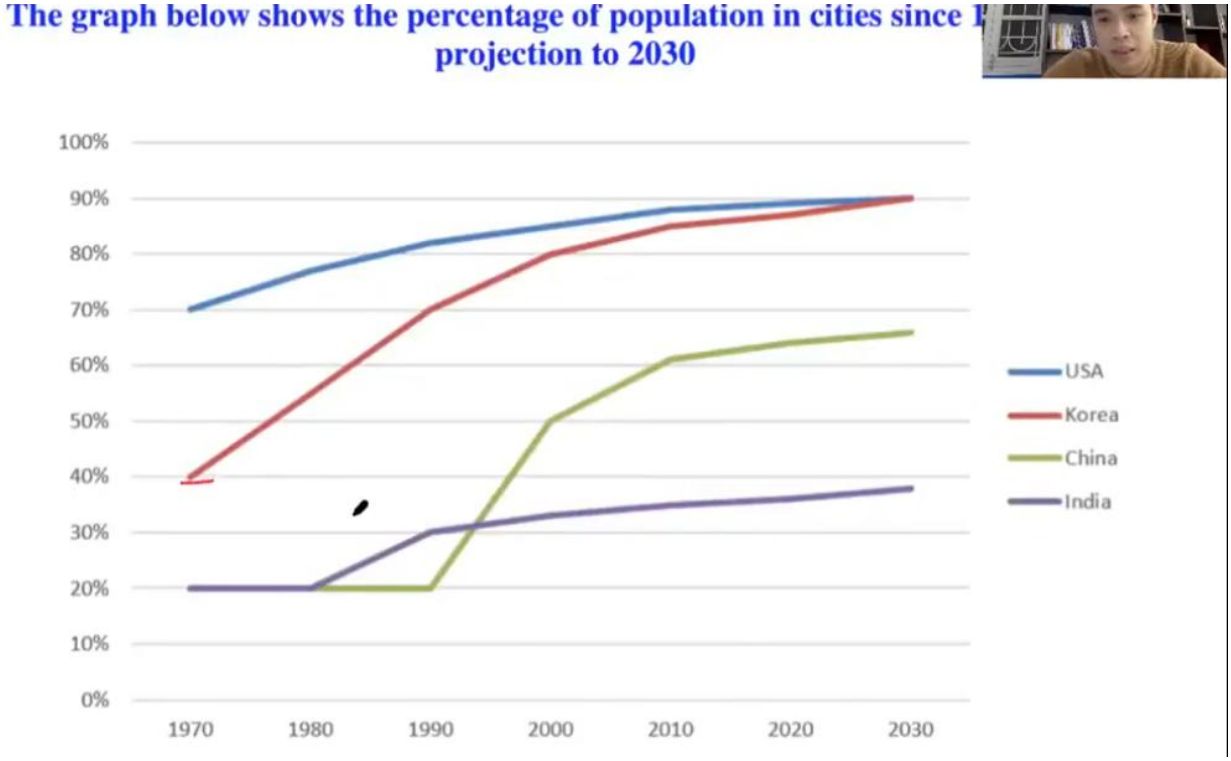

Body 2:

9% of people in the survey said that they often cycled to school in 2004, followed by a rise to 16% after a half decade. The figures for people taking a train or walking to school increased negligibly, reaching 4% and 6% respectively.

Lesson 6: Future

Important language

- To be likely to/ expected/ anticipated/ predicted/ forecasted/ projected to ...
- a prediction/ anticipation/ projection of a rise/ decline to ...

The proportion of US citizens living in cities/ urban areas started at 70% in 1970, after which it experienced a steady rise to about 88% in 2010, before being expected to reach 90% in 2030.

70% of the people living in the US chose to reside in urban areas in 1970, with a steady growth to about 88% in 2010, and a prediction of a slow growth to 90% at the end of the period.

The proportion of the US population residing/inhabiting/ dwelling in cities increased steadily from 70% in 1970 to about 88% in 2010, followed by a projection of a slow rise to 90% in 2030.

Lesson 7: No change

- Intro - paraphrase
- Overview - Differences
- Body 1: Highest (similar? Opposite?)
- Body 2 :... The rest

Important structures

- ... , and the figures for ... and ... were/are lower, at ... and ... respectively
- , ... Followed by ...
- While ... , ...
- Data ... , compared to ... / as opposed to/ in comparison to ...
- .... (Far) exceeds that of ... and ... , with respective figures being ... . And ..
- … was ... , which was % higher than that of ... .

Examples:

- . The oil consumption in Japan was about 70 million tonnes, and the figures
- for the UAE and Canada were lower, at 20 million and 35 million
- respectively.
- . The oil consumption in Japan was highest, at 70 million tonnes, followed
- by Canada (35 million) and the UAE (20 million)
- . The oil consumption in Japan far exceeded that of the UAE and Canada,
- with respective figures being 70 million, 20 million and 35 million tonnes.
- . The oil consumption in Japan (about 70 million tonnes) was far higher than
- that of the UAE and Canada, which was 20 million and 35 million
- respectively.
- . About 70 million tonnes of oil was consumed in Japan, compared to about
- 20 million in the UAE and 35 million in Canada.
- . Kuwait had the highest use of water, at 63%, whereas its use for agriculture
- was only less than a third of this (19%)

Other structures (comparing + adding info)

- . Developing countries are more reliant on alternative energy production
- than developed countries (Around 69% and 20% respectively)
- . Solar power accounts for far less of the total energy production than gas or

- coal does, and the figures are 2%, 20% and 60% respectively.
- . The Middle East produces twice as much oil as Europe throughout the
- period, with respective figures being ...
- . The oil production in the Middle East was double that of Europe
- throughout the period.
- . Western countries consume three times as much oil as the Middle East
- almost over the period.
- . Russia consumes slightly more oil than Germany.
- . The production of oil in The Middle East and Europe is equal / the same /
- similar.

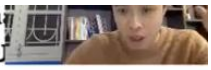

Lesson 8: No change – overview

- Differences + Similarity

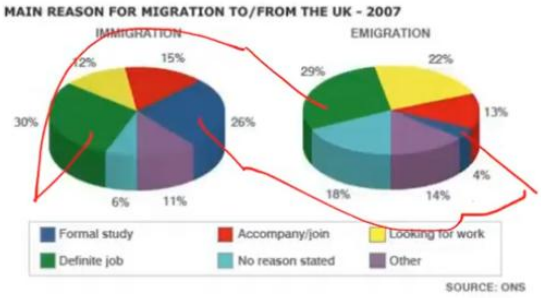

Intro+ Overview

- The charts illustrate why people migrated to and from the UK in 2007.
- Overall, the percentage of people moving in or out of the UK to undertake a permanent job was highest in both charts. In addition, the figure for those who came to the UK to pursue a formal education was also significant, but this is the least stated factor among emigrants.

The pie charts show the mi… migration to and from the U…

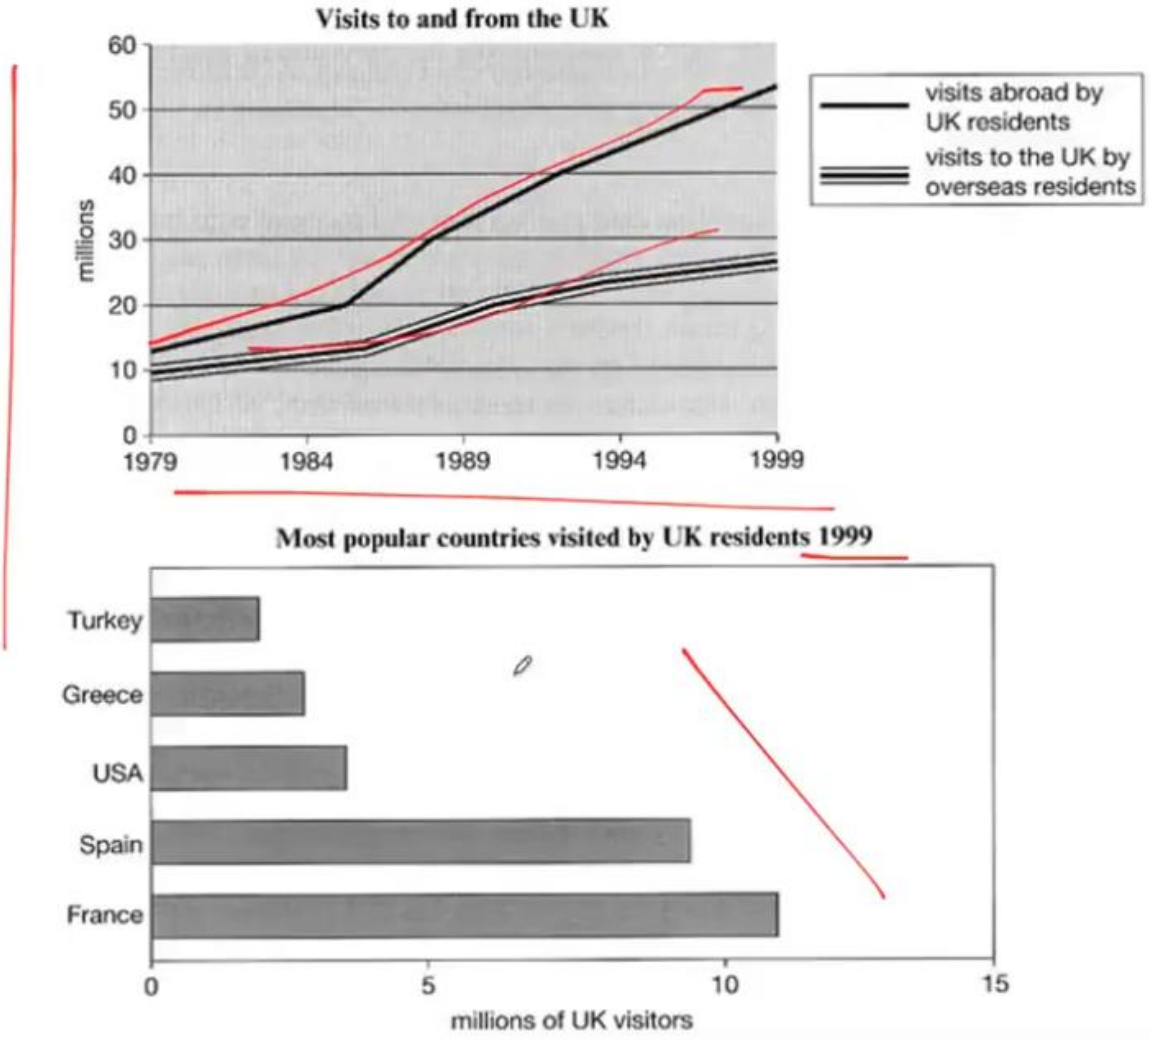

Summarize the information by selecting and reporting the main features and make comparisons where relevant.

Lesson 9: Mixed Chart

Solution:

- One introductory paragraph (it includes 2 intros)
- 1 overview (2-3 sentences, one for each chart)
- 2 bodies (one for each)

Introduction:

The line graph illustrates the number of UK residents going abroad from the UK and overseas residents visiting the UK between 1979 and 1999. The bar chart gives information about how many UK residents travelled to five of the most popular countries in 1999.

Overview

Overall, there was an increase in the number of visits to and from the UK and there were more visits abroad by UK residents than to the UK by overseas residents over the period given. In addition, the most popular country to visit by UK residents was France in 1999

Body 1 for line graph:

The number of UK residents visiting overseas began at just under 15 million, after which it rose significantly to reach over 50 million in 1999. Similar changes, but to a lesser extent, can be seen in the figures for overseas residents visiting the UK, which had climbed steadily from 10 million in 1979 to just under 30 million by the final year.

Body 2 for bar chart

In 1999, France was visited by over 10 million UK residents, followed by Spain at approximately 9 million, The figures for the USA and Greece were lower, at about 4 million and 3 million visitors respectively. The least popular country visited was Turkey, which had only about 2 million UK residents going there.

Lesson 10: Maps

- . Intro: paraphrase
- . Overview - (2-3 most significant changes)
- . Body 1: West-Center
- . Body 2: Center-East
- . Remember to link features together

Necessary language

- To be added: was constructed/ built/ erected

- To be removed: demolished/ was knocked down (to make way for ...) [them to make way for thi no giong cau truc o duoi]

- To be changed into sth: was converted into/ was turned into/ was transformed into/ replaced by

- Stayed the same: remained/ no changes were made to

- Rebuilt: to be moved to/ to be reconstructed on to the ... of/ (old) redeveloped as a (new-bigger/more modern)/ to be modernized

- Land: bare/ vacant/ open space

Necessary language

- Roads, railway: extended/ widened/ reopened/ joined / branch off – deviate (tachs nhanhs)

- Trees/ forest: cut down/ chopped down/ cleared to make way for/ planted/ ... was built at the expense of the green area.

- Amenities (swimming pool/ shopping malls: established/ developed

Important structures

- . And
    - While
- . The ... also saw a number of changes, with A being turned into B, and C being converted into D
- ., which was accompanied by ...
- . ... was constructed ... , replacing ...
- . There used to be a ... , but it was then redeveloped into ... (removed to make way for .....)

Introduction:

1 - The diagrams

The pictures/maps

2 - show

illustrate / describe

3 - how the town of Harborne changes from 1936 to 2007

the changes that took place between 1936 and 2007 in a town called Harborne

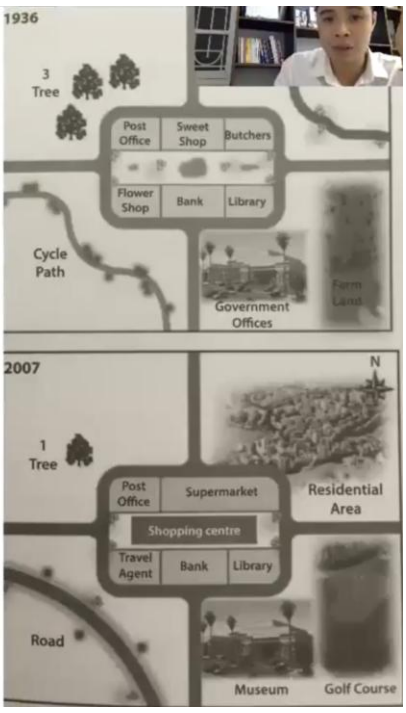

google.com - Để thoát chế độ toàn màn hình, nhấn Esc

Overview:

1: Overall, the town underwent *a number of dramatic changes, the most important of which are the development of* **a large residential area and more shops. (2 or 3 most noticeable changes)**

Overall, the town underwent a number of dramatic changes, the most important of which is/ are the development of…/ expansion of…/ disappearance of…/ rearrangement of/

The expansion of a housing area catering for the increase in the population of the town/ the construction of 2 sports fields catering for recreational needs/ addition of 2 classroom areas catering for the increase in student numbers/ expansion of the hospital catering for the increase in healthcare needs.

Body 1:

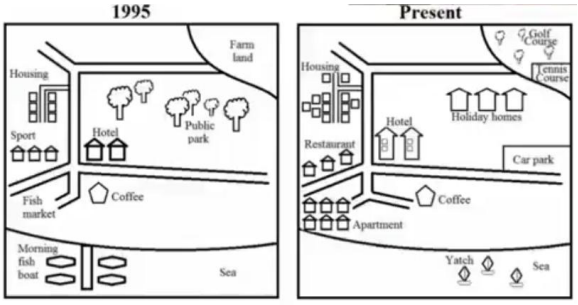

West side → Center.

In the north-west, most of the trees were cut down, and in the south-west the bicycle track was converted into a roadway. In the center of the city, the post office, bank and library remained, while in the northern section, the candy store and butchers shop were converted into a supermarket. A shopping center was constructed in the center of the downtown, replacing most of the open space there. There used to be a flower shop in the southern part, but it was then redeveloped into a travel agent.

East side

In the north-east of the downtown area, the river was turned into a lake, **which was accompanied by** a large residential area being built on its shore. Meanwhile, the south-east of the town also witnessed significant changes, **with** the government offices being transformed into a museum and the farmland becoming a golf course.

The two maps illustrate changes that have taken place in an area from 1995 to the present.

→ The diagrams show **how a seaside town has changed** since 1995.

→ Overall, the town has undergone a number of dramatic changes, **the most important of which** are the expansion of housing areas, the disappearance of the green area and the development of amenities catering for recreational needs.

The north-west of the town saw a number of changes, with the expansion of the accommodation area, and the replacement of a sports center by a restaurant complex. The hotel in the middle of the map was upgraded into a two-storey building, while the public park was replaced by holiday homes and a car park. A tennis court and a golf course were built, replacing the farmland in the north-eastern part of the area.

There used to be a fish market in the south-east of the town, but it has been redeveloped into an apartment complex, which was accompanied by the demolition of the pier where morning fish boats used to dock. To the east of the new apartment area, the coffee shop was moved eastwards, and a small road running parallel with the main road was constructed to allow access to this shop. Finally, the southern beach is open for tourists and locals alike to relax, with the availability of yachts.

Lesson 11: process

- Intro: paraphrase
- Overview (cau chung mot vai step)
- Body 1: Group steps together (vd: stage 1: chuan bi, stage 2: So che/…)
- Body 2: ...

Important structures

· Nhớ dùng câu bị động!

Từ nối

- At the beginning of the process, S +V, after which ...
- Next, ...
- Then ...
- Subsequently ...

- Body 2: The process continues with
- Finally/ At the final stage of the process ...

Intro: Paraphrase

The diagram shows how fruit is canned.

The picture (diagram) describes (shows) the process of + V-ing

= how to + V ... / how S +V

Overview

Overall, the process comprises a number of steps, beginning with ... and ending with ...

(sau with la danh tu)

Body 1: handpicking → coring/slicing

At the beginning of the process, fruits are picked by hand, after which they are transported by trucks to a factory where they are washed. Subsequently, the fruits are checked to ensure that they are qualified for production. After the fruits are stored in low temperatures, they are weighed carefully and divided into different groups according to their quality. Once they have been categorized, the fruits are peeled, cored and sliced into smaller chunks.

Body 2: Canning → delivery

The process continues with the chopped fruits being packed/put into tin cans. The cans are then sealed tight with a lid before being cooked and sterilized under high heat in order to eliminate unwanted bacteria so that the food inside can be kept edible for a longer period. A label is then attached to each can, which is followed by the cans being put in storage. Finally, the finished products are shipped to retailers and wholesalers for sale.

Lesson 12 : Natural Process

- Không có điểm ending
- Động từ là chủ động

Important structures

. Nhớ dùng các cấu trúc như sau để tránh viết toàn câu đơn.

. Before V-ing/ S+V, S +V.

· After ... , S +V

· Once S+V, S+V (một khi cái gì đó đã bị làm sao, cái gì đó sẽ tiếp tục)

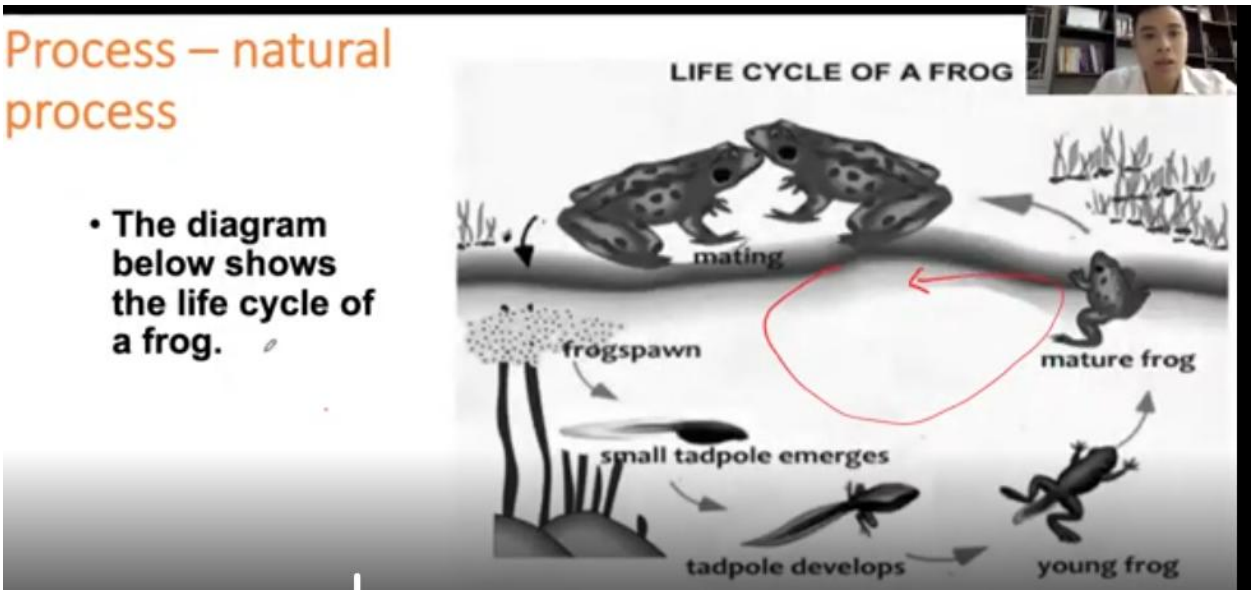

· ... , after which ...

. ... , and then ...

· ... , at which point ...

. Advanced: in order to/ so that/ to ensure that

· Nhớ dùng câu bị động!

Intro + overview

. The diagram shows the reproduction process of frogs.

. Overall, there are various stages in the life of a common frog, from mature frogs mating to produce frog spawn, to the growth of the immature form, known as tadpoles, to mature frogs developing some time later. (thêm ing vào thành cụm danh từ)

Body 1

. At the beginning of the process, the mating of two adult frogs takes place on the bank of a rive or pond, after which frogspawn or eggs are laid in the water by the female. This is followed by the frogspawn developing into tiny tadpoles, at which point they gradually develop their limbs, and organs and change their body shape while living in the water.

Body 2

. The process continues with the tadpoles growing into young frogs, which still display the tail section. However, the tail is shorter than that of a tadpole. These young frogs continue to inhabit in the water before they develop into mature ones and are able to live outside the water. It is important to note that they lose their tails at this stage. Finally, the cycle begins again when two fully- grown frogs, which are capable of reproducing, mate.

Lesson 13 : How something works

· Intro

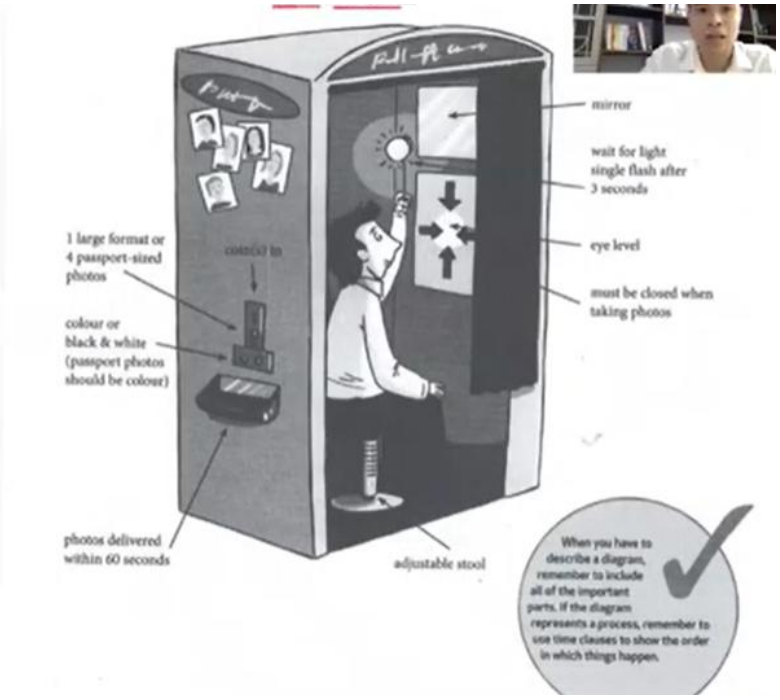

. Overview -purpose

. Body 1: Equipment (construction)

. Body 2: Operation

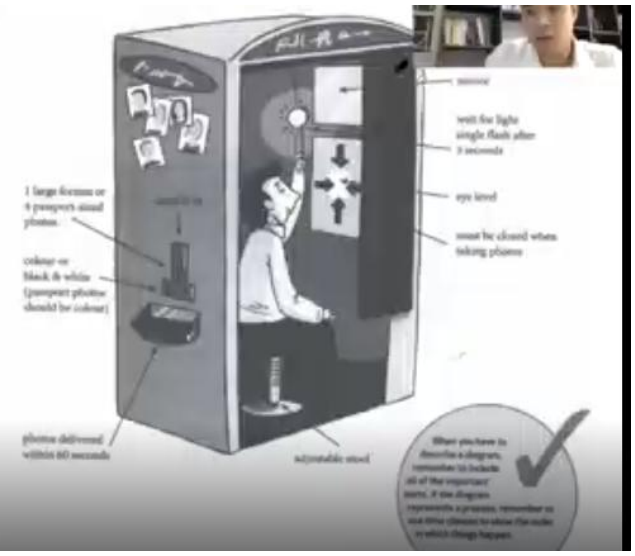

Intro + overview

- The diagram shows how to use a coin-operated photo booth.
-
- Overall, following some simple procedures, customers can take a photo of themselves, but the photo booth does not allow them to obtain their photo instantly because they have to wait for one minute for it to come out.
-

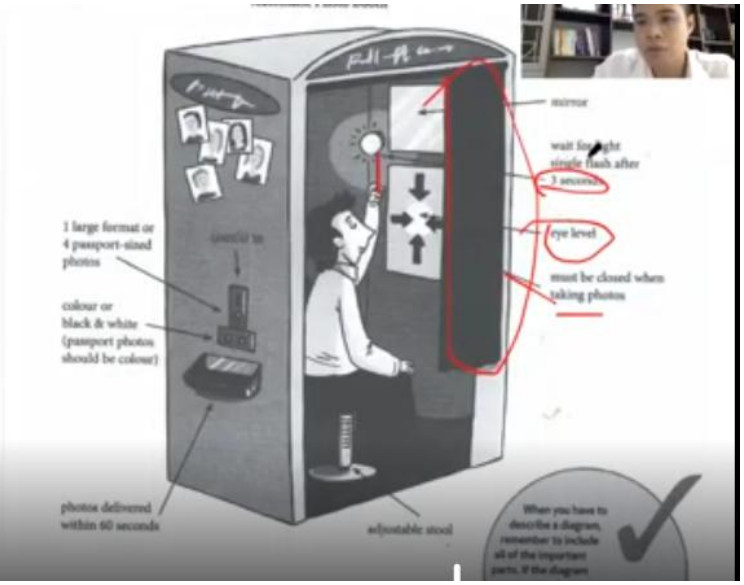

Body 1

- Regarding the equipment of the booth, it is about the size of a normal phone booth, and there is a slot on the left side for coins to be inserted. Under this part are two buttons: one to choose a large photo and the other to choose 4 passport-sized ones. In addition, users can also opt for a black and white photograph or a colored one, but it is recommended that pictures taken to apply for a passport be colored. There is an adjustable stool inside the booth and a screen for them to adjust their eye level. A mirror, which is above the screen, allows people to check their appearance and a light bulb is positioned in front of this mirror.

Body 2

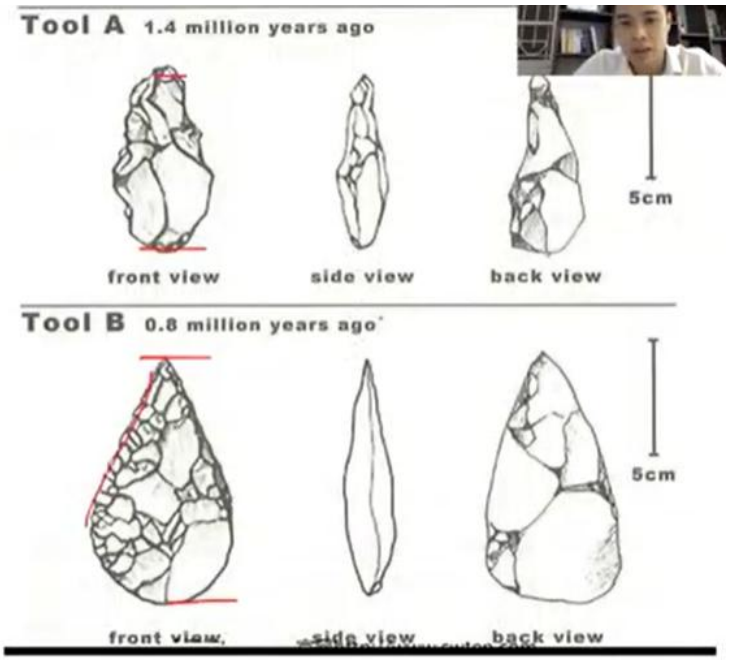

- Turning next to what customers need to do inside the phone booth, the curtain at the doorway must be closed. After pulling a string above their head, they have 3 seconds to position their eye level and a flash light appears only once to provide enough light for their photo. Finally, their photo, or photos, can be collected after one minute on the tray outside of the phone booth on the left under the buttons that they need to press to choose the color of their photo.

Lesson 14 : Odd question

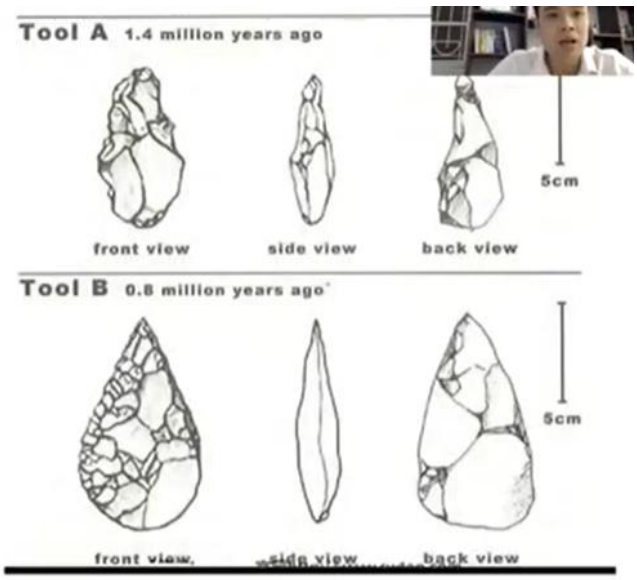

Odd questions

- ***The diagram below shows the development of cutting tools in the Stone Age. Summarise the information by selecting and reporting the main features and make comparisons where relevant.***

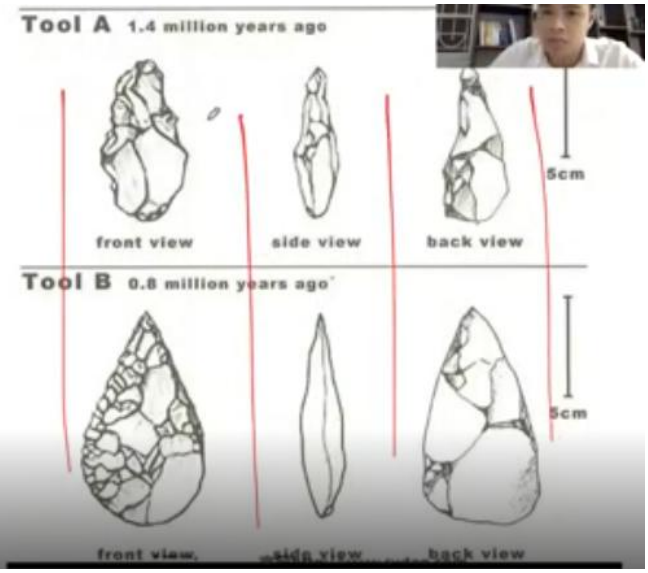

Stone

- The picture shows how cutting tools in the Stone Age had developed, with tool A dating 1.4 million years ago, and tool B 0.8 million years ago.
- Overall, tool A was much more rudimental, with its edges being less defined, and therefore less sharp, and tool B's surface was less rugged and it was larger and longer than its earlier counterpart. Both improvements allowed humans to hold it more easily and enhanced its cutting functionality.

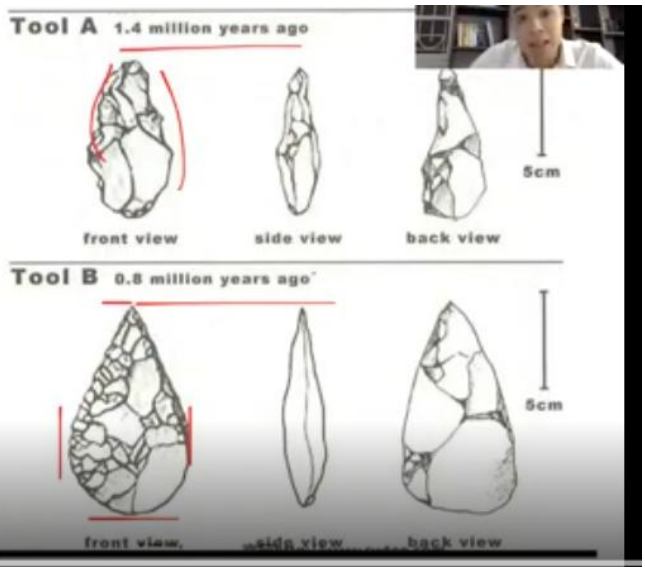

Sample 1

- Tool A was about 9 cm long, which was approximately 2 cm shorter than tool B. The front and back views of both tools reveal that the latter's surface was much smoother, and its pointy shape resembled a waterdrop, making it easier to hold at the bigger end and more efficient in piercing food.
- The side view clearly indicates that the thickness of both tools was the same. However, the well-defined line running from the top to bottom of the picture means tool B had become much sharper.

Stone

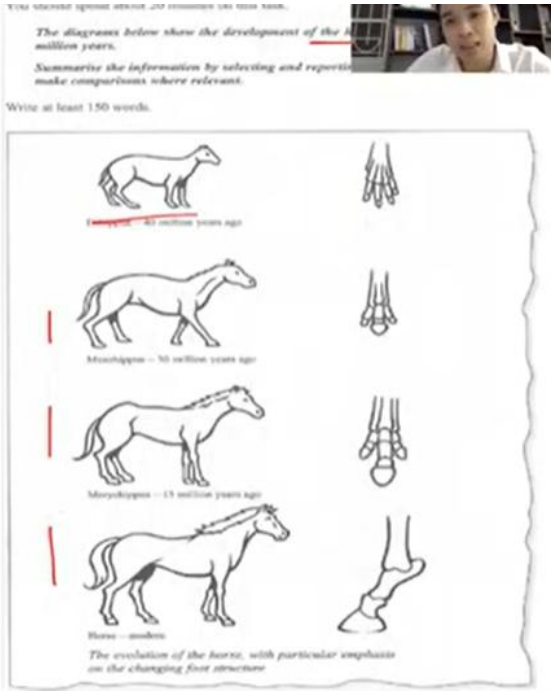

- The picture shows how cutting tools in the Stone Age had developed, with tool A dating 1.4 million years ago, and tool B 0.8 million years ago.
- Overall, tool A was much more rudimental, with its edges being less defined, and therefore less sharp, and tool B's surface was less rugged and it was larger and longer than its earlier counterpart. Both improvements allowed humans to hold it more easily and enhanced its cutting functionality.

Bài này là so sánh nhưng mà từ vựng ở đâu để so sánh

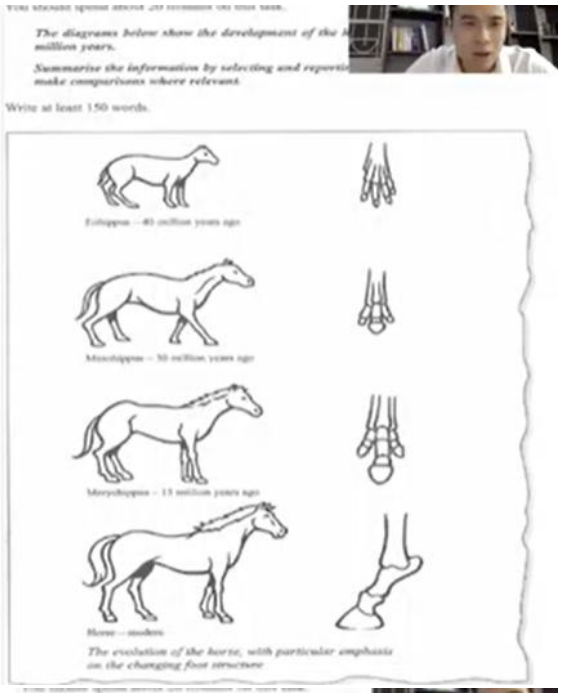

Horse

- The pictures show how the horse has evolved over the course of 40 million years.
- Overall, the size of the horse has increased significantly with the emergence of new features such as manes and hooves.

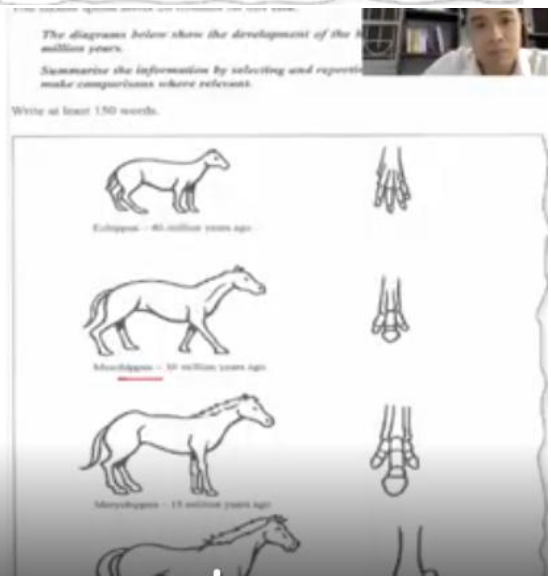

Body 1

- Forty million years ago, the Eohippus, which was the first in its lineage, had a short neck and tail and it had four similar-sized toes on each foot. Ten million years later, the Eohippus had evolved into the Mesohippus, which was almost double its ancestor in terms of size, tail and neck length. The foot structure of the later creature had also changed as it had only 3 toes, with the middle one being bigger than the side ones.

Body 2

- About 15 million years ago, the Merychippus, which had evolved from the Mesohippus, had a discernible mane and the tail was a bit thicker and longer than that of the Mesohippus. Its body size and other features were similar to those of its closest ancestor, but the toes of the Mesohippus had become much bigger, with the size of the middle one doubling that of the other phalanxes. Finally, the present-day horse had become a bit taller and larger than the Merychippus. It had lost its side toes and developed a large hoof. Its tail and mane are distinctively longer than those of its ancestors.
